How to add BETTER COMMENT COLORS in the VS Code Editor like this:

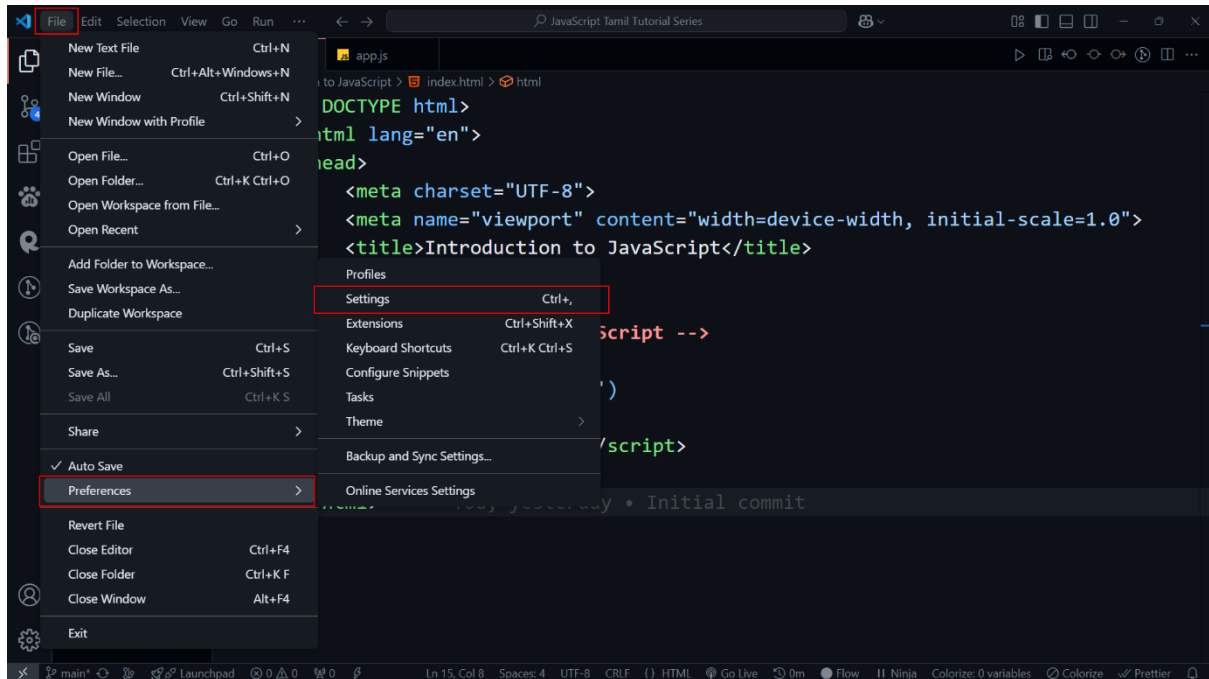

STEP 1:

Make sure that BETTER COMMENTS extension is installed in your VS Code Editor
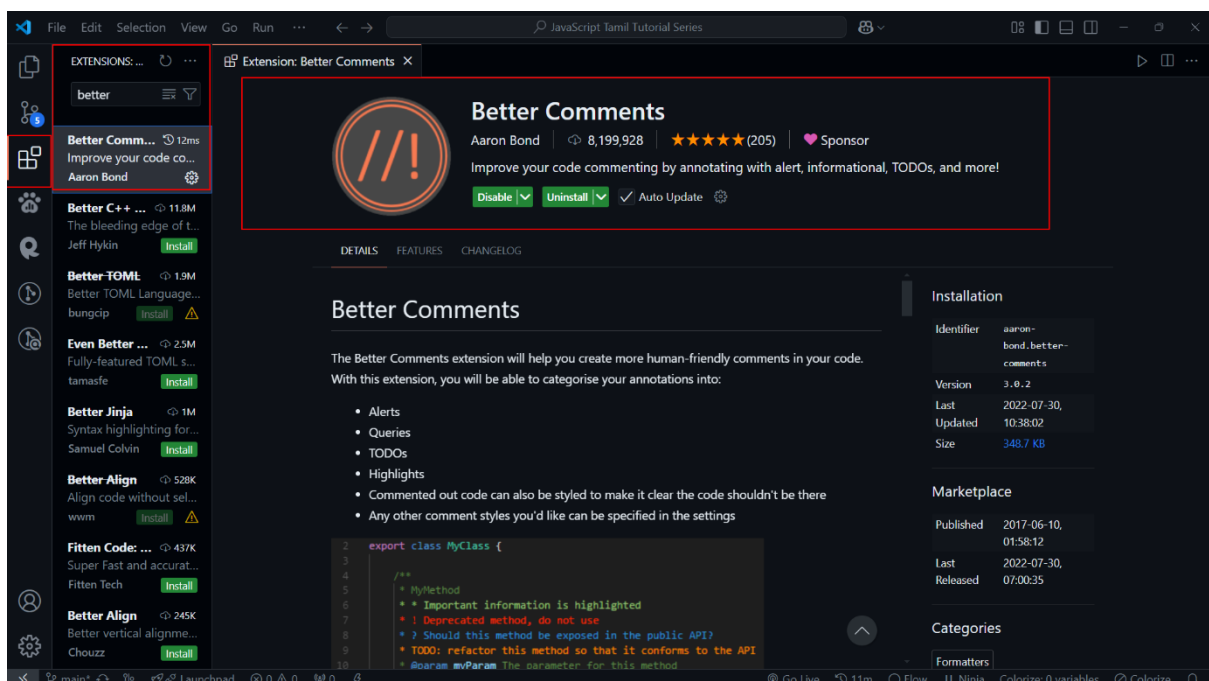

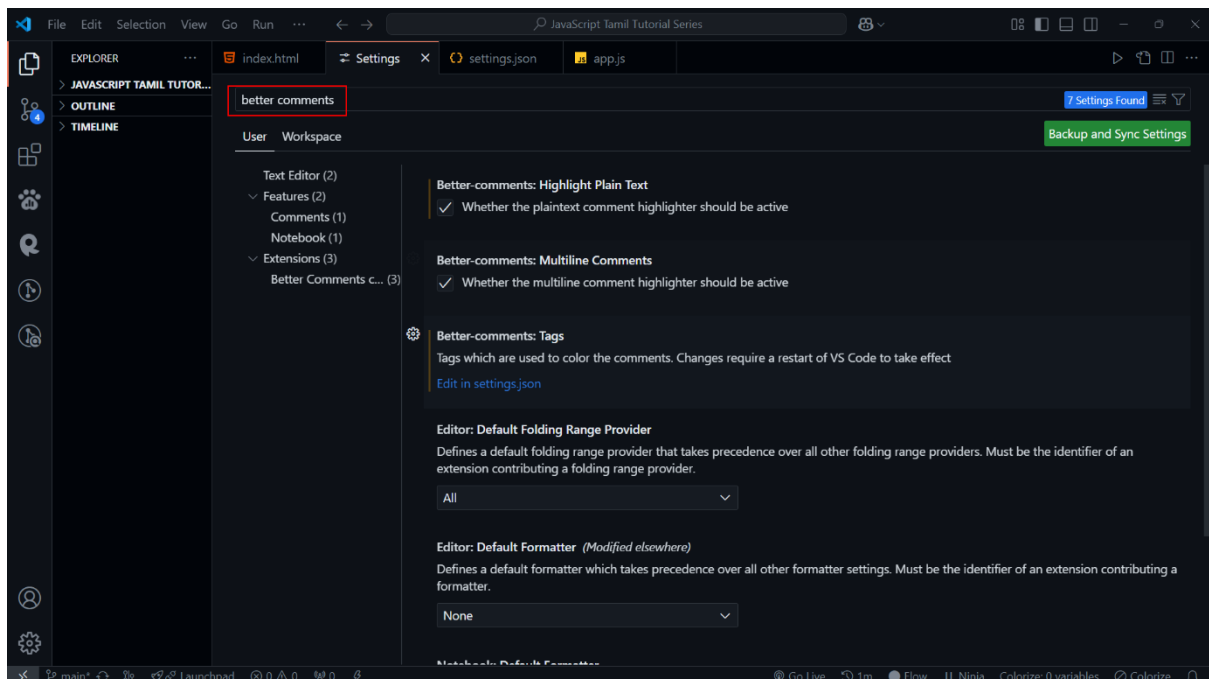

STEP 2:

Go to file -> Preferences -> Settings in the VS Code Editor

STEP 3:

Type Better Comments in the search box shown below

STEP 4:

Click the Edit in settings.json option shown below

STEP 5:

Go to the line which has this code "better-comments.tags"

STEP 6:

That's it. Now change the tag name, color or any other property you wish to change below and restart your vs code. You can also add manual tags you wish by just duplicating the existing one and changing the tag name, colors etc.
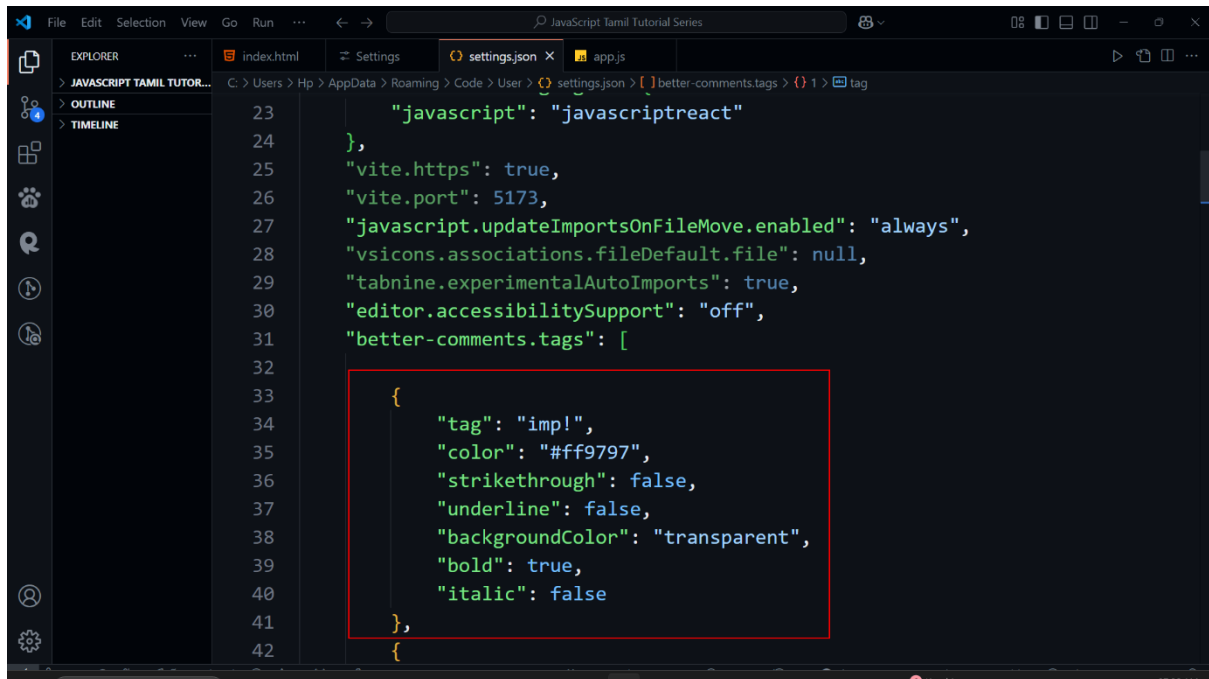

Check out the color codes which I use the most for comments in the VS Code (You can use it if you wish). Just copy the code and paste it in the "better-comments.tags" code line.

1. Important tag:

```
{
"tag": "imp!",
"color": "#ff9797",
"strikethrough": false,
"underline": false,
"backgroundColor": "transparent",
```

```
    "bold": true,
    "italic": false
    }
```

2. Title tag:

```
{
"tag": "title:",
"color": "#b4ff73",
"strikethrough": false,
"underline": false,
"backgroundColor": "transparent",
"bold": true,
"italic": false
}
```

3. Note tag:

```
{
"tag": "note:",
"color": "#a584ff",
"strikethrough": false,
"underline": false,
"backgroundColor": "transparent",
"bold": true,
"italic": false
}
```

4. Theory tag:

```
{
"tag": "theory:",
"color": "#ffa4f7",
"strikethrough": false,
"underline": false,
"backgroundColor": "transparent",
"bold": true,
"italic": false
}
```

5. Program tag:

```
{
"tag": "prog:",
"color": "#9bf39b",
"strikethrough": false,
"underline": false,
"backgroundColor": "transparent",
"bold": true,
"italic": false
}
```

6. Solution tag:

```
{
"tag": "soln:",
"color": "#ffd37",
"strikethrough": false,
```

```
"underline": false,
"backgroundColor": "transparent",
"bold": true,
"italic": false
}
```
